Two Development agencies for some target groups

2169. SHRl SURYABHAN PATIL VAHADANE: Will the Minister of WF.LFARE be pleased to state:

(a) whether several rural development schemes reserve a component of their scheme for the benefit of SC/ST and other weaker Sections;

(b) if so, why there ij a need for Special Central Assistance to the

special comjponent plan for SCs in the State schemes (SCA-SCP-SCs);

(c) whether the "SCA-SCP-SCs" does not lost only to create two different agenoies for the same targeted group as the objective could *he* achieved by reinforcing the fund under other development schemes; and

(d) whaf actions have been taken for .checking . fraud, withdrawal and to avoid overlapping of targeted families under different schemes?

THE MINISTER OF WELFARE (SHRI BALWANT SINGH RAMOO- WALIA); (a) Yes, Sir.

(b) and (c) The SC community suffered irom and continues to suffer from below poverty line economic status, poor asset base, dependence on wage labour, subsistance farming, share cropping, unclean occupation with attendant social and civil disabilities. The Special Component Plan (^P) strategy of the Government was evolved with the objective of overall development of SCs to bring them above tlTe poverty line and into the mainstream life with equal social and economic status with other Sections, of the .population. SC Js envisaged to channelise the flow of outlays and benefits from the general sectors in the Plans of States and Central Ministries^ at least in proportion to their population both_ in physical and financial terms. Special Central Assistance'(SCA) is provided to States as an additive to their SCPs for Scheduled Castes. States have to utilise SCA funds in con-juction witlr their "SCPs on economic development activifies programmes for SCs under various sectors, particularly in the core sectors li'ice agriculture, animal liusbandry, village and cottage industries- sericulture, etc. SCA is to give an added thrust to family oriented schemes of economic development of SCs by providing vital missmg mputs, so that Schemes could be more meaningful. SCA is' an important instniment foi the poverty alleviation among SCs. The strategy of SCP itself implies development of SCs from all sectors of development in the Plans of States and Central Ministries. As such,-the question of 5CA leading to creation of two different agencies for the same target group does not arise.

(d) Through scrutiny of utilisation of SCA funds under various sectors/ schemes is carried out through annual progress report on utilisation of SCA funds and physical achieve ments under the schemes, furnished by the State Govts, in prescribed pro-form a devised for the purpose. SC families economically assisted under integrated Rural Dqvielopment Pto-igramme (IRDP) and non IRDP are monitored under Point n A of Twenty Point Programme. .
